OBJECTIVE

Highly motivated college freshman seeking part-time position or internship to gain real-world work or research experience and develop strong workplace skills.

EDUCATION

Harvey Mudd College, Claremont, CA — Expected May 2030
B.S., Engineering

Basis Independent Silicon Valley, San Jose, CA — May 2026
GPA: 3.97/4.00; AP score of 5 in: Calculus BC • Statistics • Physics (1, Mechanics, E&M) • Chemistry • Computer Science (A and P) • Research

HONORS AND AWARDS

Harvey S. Mudd Merit Award • National Merit Finalist • AP Scholar with Distinction, 2023-2026

SKILLS

Proficient in Java, C++, Python • familiar with Excel, MATLAB, Git • working knowledge of Assembly • technical exposure to RISC-V verification, robotic control, machine learning • fluent in Mandarin

ACTIVITIES

Very Large-Scale Integration Design Lab: Verification Research Volunteer — October 2026 - Present
- Studied floating point standards and implementation in RISC-V architecture
- Contributing to an IBM floating point test suite implementation for processor verification

Mudd Amateur Rocketry Club (MARC): Avionics Engineer — September 2026 - Present
- Developing state estimation and active control systems for high-powered rockets
- Contributing to team Github repository and library integration
- Building an individual rocket from scratch for a Level 1 High Power Certification

Robotics Club: Co-Captain, Driver, Programmer, Designer, Builder — September 2021 - March 2026
- Developed an odometry-based tracking and positional control system in C++ from scratch
- Headed experimental design and created novel mechanisms to improve robot capability

University of Washington: Research Intern, Electrical and Computer Engineering — June 2025 - August 2025
- Conducted research on EEG-based seizure prediction with vision transformers
- Acquired skills in working with servers, interpreting academic papers, and modifying large models
- Explored quantization, FPGA, and transformer structure concepts

ADDITIONAL LEADERSHIP

Tutoring: AP and SAT tutor — August 2022 - Present
- Individually taught four students in math, physics, chemistry, and SAT both in-person and online
- Managing schedule, developing personalized lesson plans, and maintaining effective communication

Math Modeling Club: Co-President, Co-Founder — August 2024 - May 2026
- Created slides and scripts for meetings, taught competition-level data analysis techniques
- Led teams to compete in HiMCM and M3 competitions, building critical-thinking and collaboration skills

Physics Circle: Vice President — August 2023 - May 2026
- Taught material from AP Physics 1, 2, C, and beyond (ex. quantum)
- Collaborated with fellow student leadership to construct curriculum and instructed 20+ students
